Analyzing Cave Climate and Visitation

Project Title	Analyzing Cave Climate and Visitation
Summary	Are you interested in statistics and climate? Help us analyze climate and visitation data to better understand how visitors affect Carlsbad Caverns National Park's amazing cave resources.
Country	United States

Project Description

As a member of Carlsbad Caverns National Park's Resources Division, you will analyze CO2, temperature, humidity, sound, and other data from Carlsbad Cavern - one of the most popular show caves in the world and a UNESCO World Heritage Site. You will use datasets spanning multiple years to determine trends and relationships which will inform future management decisions. Join our team and help protect this spectacular resource!

Required Skills or Interests

Skill(s)

Data analysis

Research

Additional Information

The ideal candidate will have a strong background in statistical analysis and be adept at using Microsoft Excel. Experience with data loggers and and interest in cave climate will be helpful.
